Method 1
Multiple Woolworths Cricket Blast Programs

• This season there is now the option to have multiple Junior or Master Blaster Programs

• This takes out the need for any back end processes to transfer players to instigate pack orders

• However not all programs display in a manner that makes the program distinctions obvious
Method 1
Multiple Woolworths Cricket Blast Programs

How to Set Up
• Click Here for MyCricket Guide on setting up a program

• It is recommended that the program details remain the same as your existing WCB program, although a different contact may be appropriate.

• It is recommended that the program description be changed. An example of what to write is below:

StarBlast is an inclusive program that caters for children of all abilities. Activities are modified to suit participants skills and additional support is provided. This is a great chance to learn the skills of cricket in a fun and relaxed environment, integrated into the Woolworths Cricket Blast program and our club.
Method 1
Multiple Woolworths Cricket Blast Programs

How to Find Registrations
• **CLICK HERE** for the guide on how to view program registrations

• It is recommended for WCB, but especially for Integrated WCB, that all participants are contacted prior to the first session

• If you have multiple programs, all registrations will be in the one list. You can determine which program a child has registered for by:
  • In the Centre Management, click on VIEW PARTICIPANTS
  • Scroll across to the column titled PROGRAM #REF
  • You can filter by this column
  • Scrolling further across also shows the responses for DISABILITY and ASSISTANCE REQUESTED
Method 2
Create a Junior Cricket Registration Form

- By creating a Junior Cricket Registration form you can customise to include the relevant information and questions for your club

- To receive a WCB pack, the WACA will need to be given a list of participants for this program, and we then liaise with CA to have them ‘transferred’ to be WCB participants

- Clubs can adjust fees to suit their needs

- Setting up a program this way will incur the $5 insurance payment as it is not build into the cost like it is with WCB
Method 2
Create a Junior Cricket Registration Form

How to Create Form
- CLICK HERE for the MyCricket Guide on creating a registration product

  - Be sure to include questions that coaches or administrators will need to know for the program
    - Does your child have a Disability?
    - What can we do to assist participation?
    - Are you interested in being involved in the program?
    - Anything else we should know?

  - Be sure to follow registrations and liaise with parents once a child has been registered.
